Experience & Research

Law Firm | Legal AI Agent Developer

Sep 2023 – Dec 2025
Jinan, China

- Designed and built a legal AI agent with Coze (AI agent platform) to support lawyers in case retrieval, statute summarisation, and matter preparation.
- Developed agent workflows for legal query classification, document retrieval, key fact extraction, and case comparison, improving repeated legal research tasks.
- Organised legal documents, case notes, and contract materials into searchable knowledge modules for consistent case analysis and client-facing drafts.

Wipro | Java Backend Developer

Sep 2022 – Jun 2023
Sydney, Australia

- Developed and maintained Java backend services with Maven and Hibernate, supporting reliable deployment and data consistency.
- Delivered Spring Boot e-commerce backend features, implementing REST API layers and front-end integration for production use.

University of Queensland | Weakly Supervised Learning (Medical)

Feb 2022 – Jun 2022
Brisbane, Australia

- Evaluated model performance on large unlabeled and imbalanced medical datasets; led data cleaning and preprocessing in Python, TensorFlow, and PyTorch.
- Built CNN and MLP models to investigate weakly supervised learning methods for medical image and NLP-based cancer diagnosis tasks.
- Publication: *Pre-training in Medical Data: A Survey*.

University of Queensland | Cardiovascular Signal Classification & Display

Aug 2021 – Nov 2021
Brisbane, Australia

- Processed and visualised cardiovascular signal classification results using Python and Google Cloud Platform.
- Built a CNN training pipeline with Hadoop, PyTorch, and Matplotlib, supporting cloud-based model experimentation.

Inspur | Frontend Developer Intern

Oct 2019 – Feb 2020
Jinan, China

- Improved provincial government website using Java, HTML, and CSS, delivering the province's government website.

Education

University of Queensland – Master of Information Technology

Jul 2020 – Jul 2022
Brisbane, Australia

- Thesis: Weakly Supervised Learning for Cyber Attacks from Only Unlabeled Data

University of Tasmania – Bachelor of Electrical Power Engineering (Honours)

Sep 2014 – Dec 2018
Hobart, Australia

- Thesis: The Influences of Wind Farm Integration to Power Grid

Skills

Backend: Node.js, Java, Spring Boot, REST APIs, Maven, Hibernate

AI/Data: Python, PyTorch, TensorFlow, GCP, Hadoop, RAG, Prompt Engineering, Agent Workflow Design

Frontend: React, HTML, CSS, JavaScript

Languages: English (fluent), Mandarin (native) • **Licence:** Australia Driver's Licence
