Experience & Research

Law Firm | AI technique provider

Sep 2023 – Dec 2025
Jinan, China

- Built a law logic solution system with Coze to provide law service, resulting in providing the lawyer case searching and case integration.
- Provided Chinese legal services.

Wipro | Java Backend Developer

Sep 2022 – June 2023
Sydney, Australia

- Developed and maintained backend services with Maven and Hibernate, ensuring reliable deployment and consistency.
- Delivered e-commerce backend using Spring Boot; implemented API layer and connected front-end systems for production use.

University of Queensland | Weakly Supervised Learning (Medical)

Feb 2022 – June 2022
Brisbane, Australia

- Researched classification performance of several models on large unlabeled, imbalanced datasets; led data cleaning and reprocessing in Python (TensorFlow, PyTorch), resulting in investigating whether medical datasets are appropriate for this method.
- Built various CNN and MLP models to investigate weakly supervised learning, resulting in image and NLP self-supervision methods for cancer diagnosis.
- Publication: *Pre-training in Medical Data: A Survey*.

University of Queensland | Cardiovascular Signal Classification & Display

Aug 2021 – Nov 2021
Brisbane, Australia

- Processed and displayed cardiovascular signal results using GCP, running the full classification process on Google Cloud Platform.
- Built CNN training pipeline using Hadoop, Python (PyTorch, Matplotlib), delivering a practical model for GCP.

Inspur | Frontend Developer Intern

Oct 2019 – Feb 2020
Jinan, China

- Improved provincial government website using Java, HTML, and CSS, delivering the province's government website.

Education

University of Queensland – Master of Information Technology

July 2020 – July 2022
Brisbane, Australia

- Thesis: Weakly Supervised Learning for Cyber Attacks from Only Unlabeled Data

University of Tasmania – Bachelor of Electrical Power Engineering (Honours)

Sep 2014 – Dec 2018
Hobart, Australia

- Thesis: The Influences of Wind Farm Integration to Power Grid

Skills

Backend: Node.js, Java, Spring Boot, Maven, Hibernate • **ML/Data:** Python, PyTorch, TensorFlow, Hadoop, GCP

Frontend: React, HTML, CSS, JavaScript

Languages: English (fluent), Mandarin (native) • **Licence:** Australia Driver's Licence
